BROWNFIELD OPPORTUNITY AREA

OPEN HOUSES

Where should we invest?

The **Brownfield Opportunity Area** (BOA) Program enables communities to put strategies in place to return dormant brownfield sites back to productive use while simultaneously restoring environmental quality.

The City of Buffalo is currently undertaking three BOA studies - **Buffalo Harbor**, **Buffalo River Corridor**, and **Tonawanda Street Corridor**.

The upcoming open houses will give citizens an opportunity to review the work to date for each BOA, and to help identify strategic sites for the development of more detailed master plans.

Past success

Turning liabilities...

The **South Buffalo BOA** and the **RiverBend** redevelopment project were located on the former site of Republic Steel.

After extensive remediation by the City of Buffalo under the NYS Brownfield Program, RiverBend is undergoing a multibillion dollar investment from two relocated green technology companies.
