

Open Workshops

Transit Options Amherst – Buffalo

Cranes cross the skyline. Orange cones dot the roads. This region is experiencing growth not seen in two generations. With proper planning all that growth is good. So our community has embarked on a study of public transportation options for the corridor connecting Amherst and Buffalo. This could include improvements to current bus service, an extension of Metro Rail or something else altogether, like bus rapid transit. We do not know where the study is headed. We do know that together we can make getting around the region safer, more environmentally friendly and cost effective.

So join us.

We want your ideas, opinions and an open discussion about transportation needs in the corridor. Transit Options is sponsored by the Niagara Frontier Transportation Authority and Greater Buffalo Niagara Regional Transit Council. Representatives from both agencies will be on hand to hear what you have to say.
