Junior League #4

TITLE: Investing in Our Strengths

DESIGN PRINCIPLES:

1. Grand Island- more development, use a link between Buffalo (city) and the falls, more transportation between.
2. Downtown- more city development, more transportation/ connecting other communities to a city.
3. “Angola on the lake”- more neighborhoods/ families, increase waterfront activity
4. Connect “green spaces” parks, existing paths etc.
5. As individuals we wanted to invest in areas that we have first hand experience with.

NOTES:
- Under water tunnel.
- Extend “parkway” traffic (slower, traffic circles) to MLK park
- Bills stadium- downtown on water.
- Strictly organic farming
- 198 between Parkside and Buffalo State to be parkway- traffic 25 miles per hour
- Organic farming.
