Define a land use pattern that supports what our region values

Promote renewables locally

Make the region’s food system a Buffalo Niagara policy priority

Anticipate, accommodate and embrace demographic shifts

Promote a more compact pattern of development

Ensure a reliable supply of labor for food production and

Our

Improve access to healthy food for disadvantaged residents

We need to plan now to prepare the region for climate

Promote urban farming and community gardens

Strengthen regional farm to table links

Pursue neighborhood-specific asset-based strategies for

As a region, we need to focus on renewable sources of energy

Promote a culture of healthier eating

Improve the housing support delivery system

Redesign revenue-raising structures to promote land use goals

Protect and restore water quality and quantity

Establish mechanisms to manage brownfields and declining

Manage the cost of public services

Create innovative financing mechanisms

Provide data and analytical resources for informed decision-

Make renewable energy growth an economic development

Conserve our climate, Our

Interests of our region and our

Chart the course for a more sustainable, renewable

Build buildings and transportation system

Build a region that provides economic and
defensive benefits to all residents through

Economic growth and development

Create Great Places and a Thriving Economy through Efficient Land Use

A VISION FOR LAND USE

STRATEGIES & ACTIONS

Reexamine land use patterns that support what our region values.

Promote renewables locally.

Make the region’s food system a Buffalo Niagara policy priority.

Anticipate, accommodate and embrace demographic shifts.

Promote a more compact pattern of development.

Ensure a reliable supply of labor for food production and

Our

Improve access to healthy food for disadvantaged residents.
